AIM OF THE SEMINAR

The seminar will be focused on a limited number of lectures and several case presentations, covering selected hot topics in diagnosis and management of renal, prostatic and bladder tumors. Case presentations will be based on the use of digital slides or a microscope with screen projection. Participants are encouraged to actively interact with the faculty during the discussion sessions and during the case presentation session. We want to create a warm and inclusive environment, where all participants feel comfortable to ask questions and bring their personal experience.
